

CareNET Services Inc.

Header Segment (ISA, GS) Standard (3010)

Last Update: October 10, 2006

C:\000v3010

SEG.	ELEM.	DESCRIPTION	TYPE	REQ.	LENGTH		REQUIRED CONTENTS / NOTE
					MIN.	MAX.	
ISA	1	Authorization Information Qualifier	ID	M	2	2	00 = no sender in next field
	2	Authorization Information	AN	M	10	10	Space fill
	3	Security Information Qualifier	ID	M	2	2	00 = no password in next field 01 = password in next field
	4	Security Information	AN	M	10	10	Space fill or security password
	5	Interchange Sender ID Qualifier	ID	M	2	2	ZZ = mutually defined. The next field will identify the sender
	6	Interchange Sender ID	AN	M	15	15	This is the account # of the sender
	7	Interchange Receiver ID Qualifier	ID	M	2	2	ZZ = mutually defined. The next field will identify the receiver
	8	Interchange Receiver ID	AN	M	15	15	This is the account # of the receiver
	9	Interchange Date	DT	M	6	6	Date that the interchange was created (YYMMDD)
	10	Interchange Time	TM	M	4	4	Time that the Interchange was created (24 hour clock)
	11	Interchange Standards ID	ID	M	1	1	U = US EDI Community of X12
	12	Interchange Control Version	ID	M	5	5	"00301"
	13	Interchange Control Number	NO	M	9	9	Control number assigned by interchange sender
	14	Acknowledgement Requested	ID	M	1	1	0 = No acknowledgment requested
	15	Usage Indicator	ID	M	1	1	P = Production Data T = Test Data
	16	Component Element Separator	AN	M	1	1	Must be different from the data element separator and segment terminator Suggested value = "back slash" (\)

CareNET Services Inc.

Header Segment (ISA, GS) Standard (3010)

Last Update: October 10, 2006

C:\000v3010

SEG.	ELEM.	DESCRIPTION	TYPE	REQ.	LENGTH		REQUIRED CONTENTS / NOTE
					MIN.	MAX.	
GS	1	Functional Identifier Code	ID	M	2	2	AG = Application Advice IN = Invoice PO = Purchase Order PR = P.O. Acknowledgement RA = Payment RQ = Request For Quote RR = Response to RFQ AG = Application Advice
	2	Application Sender Code	AN	M	2	15	Account number of the sender of this group of documents
	3	Application Receiver Code	AN	M	2	15	Account number of the receiver of this group of documents
	4	Date	DT	M	6	6	Date sender created functional group (YYMMDD)
	5	Time	TM	M	4	4	24 hour time (HHMM) Example (4:30 pm = 1630)
	6	Group Control Number	NO	M	1	9	Group control number assigned by sender
	7	Responsible Agency Code	ID	M	1	2	X = ANSI X12
	8	Version / Release	ID	M	1	12	Version being used by sender "003010"
GE	1	Number of Transaction Sets Included	NO	M	1	6	Number of transaction sets in functional group between GS and GE
	2	Group Control Number	NO	M	1	9	Must match control number in GS06
IEA	1	Number of included Functional Groups	NO	M	1	5	Number of functional groups between ISA and IEA (ie: the number of GS segments)
	2	Interchange Control Number	NO	M	9	9	Must match control number in ISA13

SEG.	ELEM.	DESCRIPTION	TYPE	REQ.	LENGTH		REQUIRED CONTENTS / NOTE
					MIN.	MAX.	

Sample Header Segments

```
ISA^00^      ^00^      ^ZZ^306009503  ^ZZ^306000000  ^050622^1322^U^00301^000000005^0^P^
GS^PO^306009503^306000000^061022^1322^5001^X^003010
```

<<<< Transaction data >>>>

```
GE^1^5001
IEA^1^000000005
```

Notes:

1. The suggested element separator for CareNET documents is the carat (^)
2. The suggested segment terminator for CareNET documents is the tilde (~)
3. The length of the ISA segment must be 106 characters, including the segment terminator
4. The 106th position of the ISA segment must be the segment terminator
